
Brazilian Ministry of Defense signs contract with Norwegian Special Mission to supply 4 Fully Automatic Flight Inspection Systems

The Brazilian Ministry of Defense, Aeronautical Command, CISCEA, signed a contract with Norwegian Special Mission AS on the 09th October 2006 for the supply of 4 (four) Fully Automatic Flight Inspection Systems – UNIFIS 3000 to CISCEA.

This contract is the largest and most significant Flight Inspection contract based on an international public tender ever awarded in the industry.

The evaluation was very thorough with analysis of the documentation by all bidders. The Brazilian Aeronautical Commission dedicated an evaluation group that traveled to all the bidders to evaluate the quality, organization,

financial strength and technical quality of the bidders. NSM proposal was found superior and in all aspects the best choice.

NSM will also use this opportunity to develop a regional service centre which will benefit all UNIFIS 3000 users in the Latin American continent.
