Oslo , March 15th , 2005

Norwegian Special Mission AS signed a development contract with Tern Inc. of Iceland to develop and supply a UNIFIS 3000 Nav aids Flight Inspection System tailored for the Icelandic environment.

This Flight Inspection System will be installed in the Beech King Air 200 owned and operated by the Icelandic Civil Aviation Administration.

The Flight Inspection System will be a comprehensive flying laboratory covering Flight inspection of Nav aids, Communication, and Radars as well as advanced environmental surveillance and monitoring of glaciers and turbulence.

The ICAA will use the System for calibration of its entire CNS/ATM environment including the ICAA part of the North Atlantic Tracks (NAT) bridging North America with Europe.

The system is planned to be operational early 2006.

Further information about Tern Systems projects can be found on their website: www.tern.is
