

Gardermoen, 21 December 2007

**Norwegian Special Mission completes Factory Acceptance Test (FAT) of the first NavAids Flight Inspection System (SIV #1) to the Brazilian Air Force. NSM proves once again to deliver on time.**

This is the first out of four (4) systems on order from the Brazilian Air Force. The systems are configured with several special features, including the use of Rockwell Collins® GNLU 930 for GBAS/ LAAS Flight Inspection.

**“Large enough to be trusted, small enough to listen”**
