## Norwegian Special Mission signs a Contract with Cessna Aircraft Company to supply one (1) Automatic Flight Inspection System for the Algerian ANSP ENNA.

---

Norwegian Special Mission (NSM) has signed a contract with Cessna Aircraft Company, a Textron Inc. (NYSE: TXT) company, to supply one (1) Automatic Flight Inspection System, to be installed in one (1) Cessna Citation XLS+ aircraft. The contract was awarded after selection through an International Public Tender process.

This contract is the third contract in which NSM is installing the UNIFIS 3000 into a Cessna Citation 560XL series aircraft. The ENNA AFIS configuration has several unique features, and one of them is the capability to inspect Microwave Landing System (MLS). ENNA has selected the DGPS-RTK as their primary positioning reference system by using the NSM-2100-GRS ground station.

The new flight inspection aircraft is planned to be operational by the end of 2009.
